ABOUT us

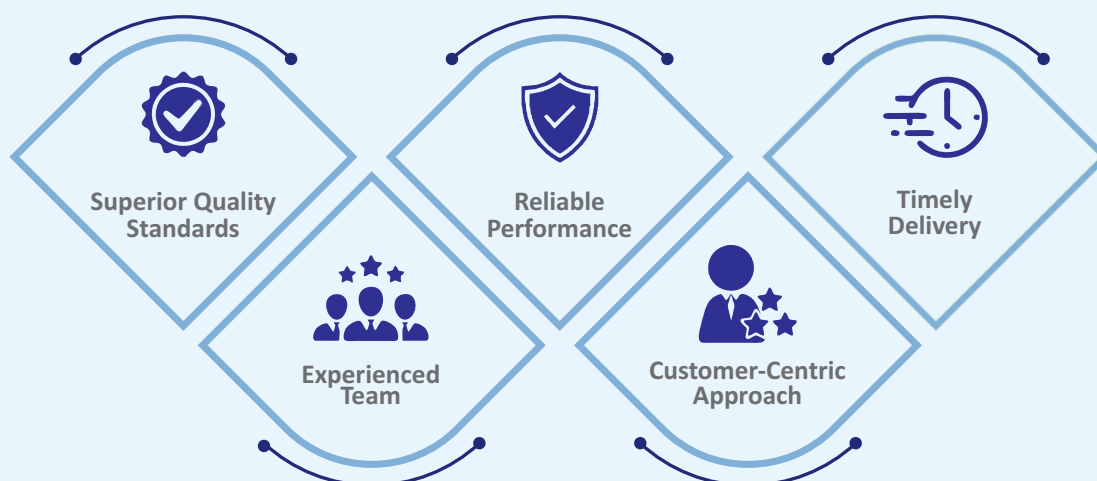

Elcon Elastomers Pvt. Ltd. Engineered for Power. Designed to Last

At Elcon Elastomers Pvt. Ltd., we don't just manufacture belts — we engineer performance. With decades of expertise and a relentless pursuit of excellence, we've become a trusted name in the design, development, and delivery of world-class industrial belts and power transmission solutions.

Our cutting-edge manufacturing facility and advanced R&D capabilities ensure every belt that carries the Elcon Elastomers name meets global standards for durability, reliability, and precision. As a leading conveyor belt company in India, we specialize in delivering high-performance industrial belt solutions for diverse sectors. Recognized among trusted conveyor belt manufacturers in India, we cater to industries such as mining, textiles, packaging, automotive, and heavy-duty machinery — where our belts are crafted to perform under pressure and designed to last.

Why Choose Us

Trusted Quality. Proven Performance. Unmatched Support.

General Purpose Conveyor Belts

Our General Purpose Conveyor Belts are designed for reliable performance across industries such as manufacturing, packaging, warehousing, and logistics.

Made using high-quality raw materials and modern technology, these belts ensure durability, smooth material handling, and long-lasting value for diverse industrial applications.

APPLICATIONS :

- Product & packaging lines
- Warehouse order-picking systems
- Assembly line transfers
- Postal, courier & distribution centers
- Greenhouse and plant nurseries
- Food and beverage packaging (with FDA/EC-approved belts)

Heavy Duty Conveyor Belts

Our Heavy Duty Conveyor Belts are engineered for tough environments and high-load material handling in industries such as mining, cement, steel, and recycling.

Manufactured using premium-grade raw materials and advanced technology, these belts deliver superior strength, durability, and reliable performance in demanding industrial applications.

APPLICATIONS :

- Mining & quarrying operations
- Cement and steel manufacturing units
- Bulk material handling systems

Fire Resistant Conveyor Belts

Our General Purpose Conveyor Belts are designed for reliable performance across industries such as manufacturing, packaging, warehousing, and logistics.

Made using high-quality raw materials and modern technology, these belts ensure durability, smooth material handling, and long-lasting value for diverse industrial applications.

APPLICATIONS :

- Coal and thermal power plants
- Cement kilns and hot mixing units
- Steel foundries and rolling mills
- Chemical processing zones
- Waste management and incineration plants
- Flammable goods storage and transportation

Oil Resistant Conveyor Belts

Our Oil Resistant Conveyor Belts are engineered for oily, greasy, and chemically demanding environments across food processing, recycling, wood handling, and automotive industries.

Made with special rubber compounds, these belts resist swelling, cracking, and degradation caused by oils, ensuring durable performance and smooth material handling in oil-exposed applications.

APPLICATIONS :

- Edible oil and food processing units
- Recycling and scrap handling
- Automobile assembly and stamping zones
- Chemical and petrochemical industries
- Wood and veneer industries
- Packaging units with oily product handling

Food Grade Conveyor Belts

Our Food Grade Conveyor Belts are designed for hygienic and contamination-free material handling in food processing, packaging, bakery, and pharmaceutical industries.

Made from non-toxic, FDA and EC-approved materials, these belts offer excellent cleanliness, flexibility, and chemical resistance while ensuring safe and compliant operations.

APPLICATIONS :

- Meat, poultry, and seafood processing
- Dairy and beverage bottling plants
- Bakeries and confectionery production

Heat Resistant Conveyor Belts

Our Heat Resistant Conveyor Belts are built for high-temperature applications in cement plants, steel factories, and thermal power units. Manufactured with advanced rubber compounds and reinforced textile layers, these belts resist cracking, hardening, and surface wear, ensuring durable, safe, and efficient performance in heat-intensive industrial environments.

APPLICATIONS :

- Cement and lime manufacturing
- Steel rolling and sintering units
- Thermal power generation plants
- Foundry and casting zones
- Glass and ceramic processing units
- Hot mixing and asphalt plants

Chevron Conveyor Belt

Our Chevron Conveyor Belts are designed for steep incline conveying, with cleated profiles that prevent material slippage and ensure smooth bulk handling.

Ideal for mining, agriculture, and construction, these belts are made with high-strength fabric and wear-resistant rubber for excellent grip, flexibility, and reliable performance on inclined systems.

APPLICATIONS :

- Sand, gravel, and crushed stone transport
- Fertilizer and agricultural grain handling
- Coal and ore loading systems
- Construction material transfer
- Mobile conveyors and truck loaders
- Incline packaging and scrap conveyors

Multi V Conveyor Belt

Our Multi V Conveyor Belts are designed for better grip, tracking, and material stability on inclined or curved conveyor systems.

Featuring multiple V-shaped cleat profiles, these belts reduce slippage and ensure smooth movement of loose, granular, or packaged materials. Made with reinforced carcasses and wear-resistant rubber, they deliver reliable performance across complex conveying applications.

APPLICATIONS :

- Fertilizer and granule handling systems
- Agricultural bulk transfer units
- Sand, coal, or mineral transport on inclines

Rough Top Conveyor Belt

Our Rough Top Conveyor Belts feature a textured surface that provides excellent grip and reduces slippage during incline conveying and delicate product handling.

Ideal for packaging, parcel distribution, and food processing, these belts offer smooth, low-noise operation, high flexibility, and safe transport with minimal product deformation.

APPLICATIONS :

- Parcel and courier handling systems
- Packaging lines for consumer goods
- Food transport with non-direct contact zones
- Baggage and carton conveyors
- Assembly units with inclined product movement

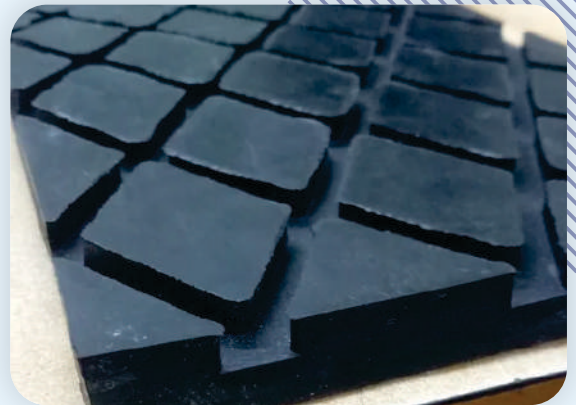

Lagging Sheet

We have an in-house manufacturing facility for lagging rubber sheets, offering a wide range of material combinations to ensure the right lagging solution based on your pulley size and application requirements.

OUR OFFERED SHEET TYPES INCLUDE :

- Plain Rubber Sheet
- Diamond Groove Pulley Lagging Sheet
- Herringbone Pulley Lagging Sheet

Truck & Trailer Body Protection Bumpers

We make Truck and Trailer molded rubber bumpers in a wide variety of shapes & sizes to meet any loading dock protection application. Bumpers include some mounting hardware (washer fitted)

These bumper guards are commonly used to protect cabinets, walls and partition corners from damage when moving carts, dollies and equipment.

Rubber bumpers are designed to protect the rear of a truck or utility trailer when backing to an elevated surface such as a delivery / loading bay.

Bumpers are constructed of durable Quality rubber for superior impact protection

Hose Ramps

Hose Ramps and Protectors Prevent bulges and line backups in high traffic areas.

Modular hose ramps stack side by side. Creating a bridge for vehicles to cross over hose without interrupting or damaging the supply line and vehicle.

Hose ramps also work great for protecting Pipes and thicker cabling which might be too large for conventional cable ramp.

Rubber Bumpers

We manufacture truck and trailer molded rubber bumpers, hose ramps, and protectors designed for heavy-duty loading dock and facility protection. These products protect cabinets, walls, partition corners, trucks, and utility trailers during backing and transport operations.

Hose ramps and protectors prevent line backups in high-traffic areas, serving as a modular bridge for vehicles to cross over supply lines, pipes, and thick cabling without causing damage.

APPLICATIONS

- A perfect protection for any high-traffic truck docks.
- In - plant wall protection from forklifts, platform trucks and other material handling vehicles.

FEATURES

- Helps maintain the dock area clean, neat and attractive.
- One piece moulding.
- Won't warp, rust, rot or harden.
- Compact in size.

BENEFITS

- Cost effective, economical.
- High impact resistance and hence long life.
- Weather-proof.
- Maintenance-free.

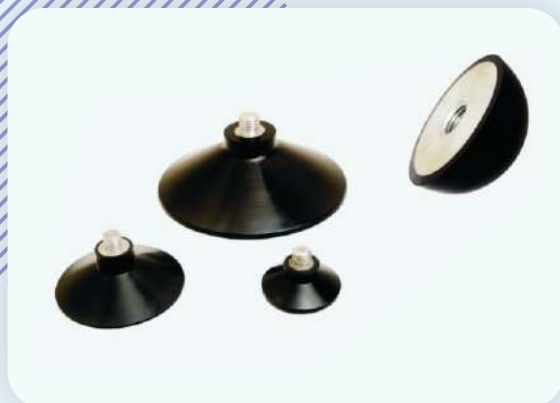

Precision Molded Rubber Parts

We manufacture all types of Rubber Parts that are fabricated with high grade materials. These rubber items are widely appreciated by the clients for their quality and are widely demanded by them.

Our Clients can avail these rubber items at very low industrial prices.

These are available in different shapes and types depending upon the fitment application.

Our products are very strong and have high tensile strength that serves our clients for longer period of time.

We offer our client an excellent quality range of Rubber Parts, which are manufactured from high grade quality raw materials.

We can make any kind of rubber parts according to customer requirements. These Rubber Parts are widely known for its durability and quality. Our Rubber Parts can be availed at industrial leading price.

FEATURES

- High-Grade Raw Materials
- High Tensile Strength
- Custom & Diverse Shapes
- Dimensional Accuracy

BENEFITS

- Extended Service Life
- Cost-Effective Sourcing
- Tailored Fit
- Reliable Performance

Extruded Rubber Profiles

We specialize in manufacturing and supplying an array of extruded rubber profiles that includes Extruded Rubber Profiles, rubber tubes and hoses etc.

Our products are widely used in various industrial sectors for the following features :

- Superior functionality
- Long lasting
- Dimensionally accurate

CUSTOM-BUILT CONVEYOR BELTS

Tailor-made solutions designed to meet industry-specific requirements with precision and performance.

ENGINEERED FOR EXTREME DURABILITY

Manufactured using high-grade materials to withstand heavy loads, abrasion, and harsh operating environments.

TRUSTED ACROSS INDUSTRIES

Serving a wide range of sectors including mining, cement, power, and steel with reliable, long-lasting conveyor solutions.
